DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the conveyor device as claimed in claim 5 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The abstract of the disclosure is objected to because it contains legal phraseology such as "means." Correction is required. See MPEP § 608.01(b).

3. The disclosure is objected to because of the following informalities:

In line 7 on page 8, "warn" should be changed to --worn--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It

Art Unit: 3682

is not clear or understood how the device includes an apron, timing belt, frame, flat driving, driving rollers, end pulleys and flat pulleys.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of "the distance" in line 11 of claim 1 lacks antecedent basis.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Yasuoka.

Yasuoka discloses in figure 7, a gear wheel comprising a first portion 5 having first half teeth and threaded holes 5b; a second portion 6 having second half teeth and enlarged holes 6c; screw means 15 which pass through said enlarged holes and engage said threaded holes so as to couple said first gear wheel and said second gear wheel.

Art Unit: 3682

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art regarding gear wheels in general:

U.S. Patent No. 5,870,928 to Genter et al.

U.S. Patent No. 4,473,317 to Bolang

U.S. Patent No. 5,833,562 to Walker, Sr.

U.S. Patent No. 2,999,396 to Kaczmariski

U.S. Patent No. 4,964,842 to Howard

U.S. Patent No. 569,216 to Lindsay
